

4G Football - Quick Start Guide

- 1 For the best coverage, place the kit on a flat stable surface (such as a tabletop or shelf), near the center of your space, as close as possible to your devices. Unlatch and open the top cover of the case for air flow.

Do not place the kit in direct sunlight, near a heat source, or inside a metal box or metal-lined closet. The kit must be placed in an unobstructed location without walls, pillars, or thick objects nearby which could affect the radio-frequency signals.

- 2 Plug the power cord into any standard 110V/2A 3-prong electric outlet.

Press the POWER button.

The power button's LED should turn solid blue.

Wait 1 minute for the modem1-3 lights to turn solid green, indicating Internet connectivity.

- 3 Connect up to (4) cat5 ethernet cables to the MikroTik router's yellow LAN ports #2-5. The router will recognize each hard-wired device and issue it a dynamic IP address (DHCP). You can connect laptop computers, desktop computers, or any device with a RJ45 ethernet port.

To connect a WiFi Access Point (optional), use a cat5 ethernet cable to connect it to any of the yellow LAN ports #2-5.

Troubleshooting

- Some 4G “dead zones” exist indoors, especially underground. To help improve 4G signal strength and speed, you may have to reposition the kit away from an obstruction (like a closet, wall or pillar).
 - If your computer is configured for static IP, please give us a call so that we can walk you through switching over to DHCP.
 - To check your speed, we recommend non-flash-based speed test tools such as openspeedtest.com or beta.speedtest.net.
 - If you are still unable to acquire Internet connectivity, please contact tech support at (866) 385-1504 x3.
-

Returning Your Rental Equipment

To avoid late charges, we ask that you please return your kit to a FedEx location no later than 1 business day after your rental.

- A. Unplug and stow the gear in your Pelican case, along with this Quick Start Guide and any Ethernet cables provided.
- B. Securely latch the case.
- C. Place the case into a cardboard shipping box.
- D. Affix the prepaid FedEx Ground return shipping label to the case.
- E. Call FedEx at (800) 463-3339 to arrange for a pickup or drop off at a FedEx retail location.

Note: Although many hotels offer FedEx pickup services, we no longer recommend this option as returns have been delayed/lost with this method. Please do not leave the case in an unmanned kiosk or hand the case to a 3rd party. You will be responsible for the package until it is scanned by FedEx.

Return Shipping Address:

Trade Show Internet
23875 Ventura Blvd., Suite 105
